Subject: Microsoft Settlement

Let s put an end to this issue with the Department of Justice and Microsoft. The technology industry needs a resolution the economy needs a resolution and most of all the taxpaying citizens need a resolution. Microsoft has made an offer for settlement that is more than fair. Let s be realistic the issue is being perpetuated by competitors of Microsoft. If there is any doubt of that just refer to the January 15 2002 comments in USA Today by the CEO s of both Sun Microsystems and Oracle.
